As you are aware that this Department is holding Regional Review Meetings zone-wise in various parts of the country. Various States/UTs have progressed differently in ushering in the system of modern & effective land records management system. Such a system is essential for effective Governance and for providing a host of citizen centric service in a shorter & faster way. In this review almost all the states suffer from slow progress implementation of survey/resurvey component. Haryana State has done considerable work in this vital activity of the NLRMP.
